Caliper Enamel

Flameproof

- Heat Resistant up to **120°C**
- **Chemically resistant** to oils and traffic film
- Protects against **stone chips and brake dust**
- Fast drying - touch dry in 30 mins
- **5x Tougher** than ordinary paints
- Clog Free **Spot Nozzle** – ideal for 3D surfaces

- Heat Resistant up to **120°C**
- Superior **UV resistance** – resists fading from the sun
- **5x Tougher** than ordinary paints
- **Direct to metal** – no need for a primer
- Clog Free **Fan Nozzle** – gives a smooth finish on larger areas

- **Ceramic technology** - Heat Resistant up to **300°C** (retains gloss)
- Superior **corrosion resistance**
- **Excellent adhesion** – won't blister, flake, crack or peel
- **5x Tougher** than ordinary paints
- Fast drying - touch dry in **30 mins**
- Clog Free **Spot Nozzle** – ideal for 3D surfaces

- **Advanced Ceramic Technology** - Heat Resistant up to **500°C**
- Achieves **high gloss finish**
- Superior **corrosion resistance**
- **5x Tougher** than ordinary paints
- **Direct to metal** – no need for a primer
- Clog Free **Spot Nozzle** – ideal for coating brake calipers

- **Advanced Ceramic Technology** (incorporates advanced heat-resistant pigment technology) - Heat Resistant up to **1000°C**
- Superior protection from **heat, oil and other automotive fluids**
- **Excellent adhesion** – won't blister, flake, crack or peel
- Clog Free **Spot Nozzle** – ideal for 3D surfaces
- **5x Tougher** than ordinary paints

RAPTOR ENGINE ENAMEL

DRIVING SURFACE PERFECTION

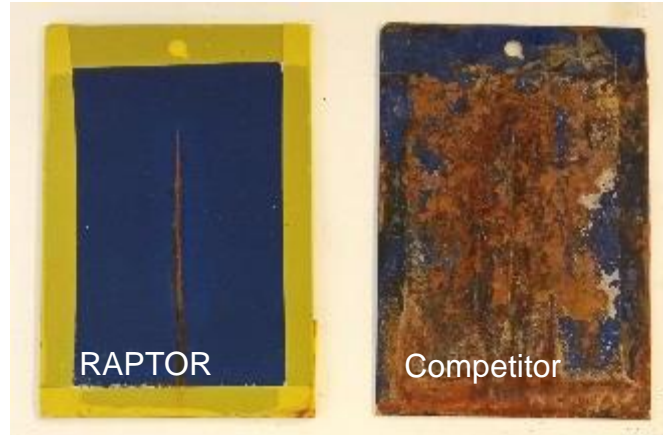

U-POL Engine Enamel
5 days salt spray
Left panel scored

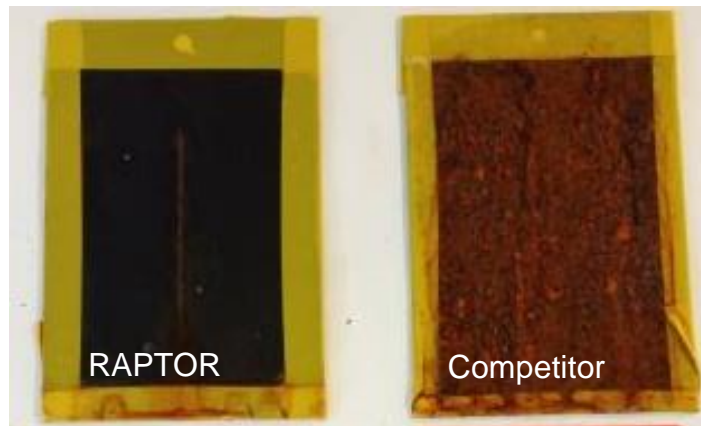

Competitor Engine Enamel
5 days salt spray
Left panel scored

RAPTOR CALIPER & FLAMEPROOF

Caliper Blue
5 days salt spray

Flameproof Black
5 days salt spray

RAPTOR FLAMEPROOF

Flameproof Red 700°C

Competitor burnt totally, there is no more film while U-POL changed color but retained its film integrity.
